of the European Union

The FoSaMed project is an Erasmus+ project funded by the European Commission which aims to develop a joint Master's Programme on Food Safety in Morocco. Running from January 2021 to January 2024, it brings together Moroccan HEIs promoting inclusive education through curriculum development and teacher education on food safety, namely Agronomic and Veterinary Institute Hassan II (IAV), National School of Agriculture (ENA), Ibn Tofail University (IBN) and Mohamed I University (UMP) that will receive the support of the project coordinator the University of Évora (UEVORA) together with the University of Barcelona (UB) and the Mediterranean Universities Union (UNIMED).

Moroccan academics are trained on modern and innovative teaching methodologies in order to design a Master programme which 1) promotes the traditional Mediterranean diet 2) is associated to short food supply chains 3) promote an inclusive higher education by involving underprivileged groups, such as women, rural populations and refugees and giving them equal access to knowledge and opportunities.
