Framework Global changes are affecting the natural environments and people's lives around the globe. Ongoing environmental, demographic, and socio-political changes are shaping the 'where' and 'how' people will be able to live in the future. Tackling the increasingly interconnected drivers of change is needed to mitigate and adapt to the effects of ongoing changes. The recently approved "European Green Deal" establishes ambitious goals for turning global change challenges into opportunities, essentially by speeding-up the transition into a truly sustainable and circular economy, towards food loss and waste reduction or prevention, while reducing the carbon footprint. The "European Green Deal" aims at the improvement of the well-being and health of citizens and future generations by providing fresh air, clean water, healthy soil and biodiversity, healthy and affordable food (food safety and food security), as well as long-lasting products that can be reused, repaired, and recycled, among others. Within the EU-Green Week, we propose a seminar, where our invited speakers will address sustainable agri-food solutions towards food waste reduction, giving some examples of best practices. The aim of this webinar is to raise awareness about the European Green Deal and promote the discussion on how every citizen may contribute to this transition.

02:30 pm **Welcome message and framing of the webinar within the EU Green Week 'The European Green Deal'**
Brief presentation of the speakers
 MARTA LARANJO
 Senior Researcher | Universidade de Évora-MED/CHANGE | Portugal

02:45 pm **FAO's FLW database. Building evidence with Artificial Intelligence**
 CAROLA FABI
 Senior Statistician | Statistics Division | FAO - Food and Agriculture Organization of the United Nations

03:05 pm **Table olive processing technology: improving quality and protecting the environment**
 ABDESLAM ASEHRAOU
 Full professor | Université Mohammed Premier | Morocco

03:25 pm **Reduction of food losses and waste in the agro-food sector: some sustainable solutions**
 ANA CRISTINA SANTOS
 Assistant Professor | Universidade de Évora-MED/CHANGE | Portugal

03:25 pm **Questions & Discussion on food waste reduction and prevention**
 Moderated by Marta Laranjo

04:15 pm **Webinar closure**
